You can choose to start the game or you can select "Options" and pick the level of difficulty you would like for your upcoming game. Your choices for level of difficulty are Easy, Normal, Hard or Expert. Pick your level by pushing the Directional Button left or right to scroll through the options.

Diamonds = each diamond is worth a special diamond point.

Chicken Leg = semi damage recovery.

Roast Ham = full damage recovery.

Golden treasures = 50 points

Goblet = 10 points

Boots = magical boots that make Havoc run faster.

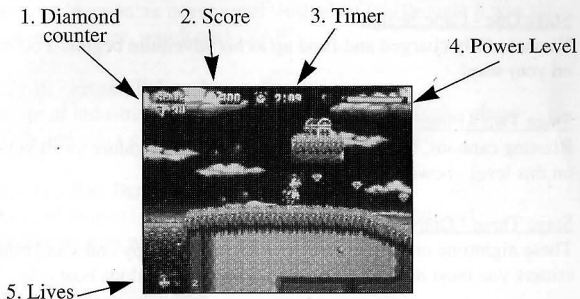

Mini Havoc Doll = one extra life

## Scoring

You can keep track of your power rating, the chances you have left and your score by looking at the counters on the screen.

1. Number of diamonds collected.
2. Your present score.
3. Timer: Shows how much time has elapsed since you began the Level. You have ten minutes to clear each level. If you go over ten minutes, a "TIME OVER" message will appear and you will lose one chance to complete the game. (The time is based on Game time and not on actual time.)
4. The power level you have.
5. The number of lives Havoc has left to get through the level.

Clear Points: You get a clearing point when you clear a Level.

Time Points: You may get these points if you clear a level super fast.

Treasure Points: These come from how many diamonds you have scored. If you score 100 diamond points, you get an extra life and increase your playtime.

Saving Points: There are a few saving points in each level. By touching these orbs, they will turn from blue to red and you can start over at this point if you are defeated later on.

All enemies are worth 100 points.
