(54) **Game apparatus, game system using same, and information processing unit**

(57) It is an object of this invention to provide a game apparatus which is capable of providing the progress of a semi-infinite new scenario and which requires less labor for the development and sale for the above-described object.

the progress of the scenario; and a program 14 for causing a CPU 1a to make a game progress by using the data group 13 on the basis of the command of the macro group 12. This game apparatus 1 comprises: first means 20 for externally incorporating a scenario macro of, for example, a puzzle game; and second means 30 for giving a command to the program 14 by means of the scenario macro SM obtained externally by the first means 20, and of providing a new scenario by reusing the data group 13.

A game apparatus 1 comprises: a macro group 12, with a scenario described therein, for commanding a procedure to process the scenario; a data group 13 consisting of video data VD, graphics GF, texts TXT, audio data AD and other information used in accordance with

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 31 0617

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
