EDITING TEAMS & PLAYERS

Editing a Statistics

Five stats determine how well a player hits, fields and runs the bases. Think of each stat as an end of season total.

- **Batting Average:** The higher the average, the more often the player will reach base.
- **Home Runs:** The higher the home run total, the better chance the player has of hitting one out.
- **RBI (runs batted in):** The higher the number, the more reliable this player will be with runners in scoring position.
- **Stolen Bases:** If a player has a high number of stolen bases, there's a good chance he'll be successful stealing a base.
- **Errors:** If a player has a low number of errors, then his fielding will be mostly flawless.

To edit player stats:

- 1 Select the stat you want to edit. The Keypad Editor appears.
- 2 Use the **<- button** to delete the previous number.
- 3 Use the Keypad Editor to change the stats within these ranges: Batting Average: 000-1.00; Home Runs: 0-99; RBIs: 0-199; Stolen Bases: 0-99; Errors: 0-50.
- 4 Select **Done** to save your changes, or **Cancel** to close the Keypad Editor without making changes.

Pitcher Editor

Choose a pitcher just as you did a player. You edit a pitcher's name and uniform number the same way you edited a player's name and uniform number (see pg. 38).

Fig. 24 Pitcher Editor

To change a pitcher's **Speed** (how hard he throws the ball), **Accuracy** (control) or **Stamina** (durability), and determine if he throws or bats right or left-handed, follow the same procedure as you did in **Editing an Attribute**, pg 39.

Note: If you make changes to your pitchers, be sure to exit the Roster Screen before quitting the game and turning off the power, or your changes will not be saved.

Editing a Statistics

Six statistics determine how a pitcher performs on the mound and in the field. Think of each stat as an end of season total.

EDITING TEAMS & PLAYERS

To change a pitcher's statistics:

- 1 Select the stat you want to edit. The Keypad Editor appears.
- 2 Use the Keypad Editor to change the stats. Use the following ranges:
 - Batting Average: .000-1.00
 - ERA: .000-50.0
 - Wins, Saves, Losses, Errors: 0-50
- 3 Select **Done** to save your changes, or **Cancel** to close the Keypad Editor without making changes.

Select Pitches

Some pitchers' bread and butter pitch is a fastball; for others, it's a screwball or knuckler. You can select each pitcher's bread and butter pitch, along with three others.

To assign pitches:

- 1 In the Pitches window, select the **#1** box. This will be your pitcher's best pitch.
- 2 Press **Button A** or **B** to cycle through eight available pitches until you see the one you want.
- 3 Repeat steps 1 and 2 to fill boxes **#2** through **#4**. Pitch **#4** is your pitcher's least effective pitch. Pitches **#2** and **#3** are average.

LEAGUE PLAY

League Play is the heart of *HardBall '95*. This is where season statistics accumulate and edits made to a team or player you own are saved even after a power down.

Note: You do not have to own a team to make player trades.

Note: If you trade away a player from a team you own, all his attribute edits will be restored to the original attributes supplied on your HardBall '95 cartridge.

To change your pitcher rotation:

Playing the Stars Game

This mid-season classic is held at the half-way point of full and half seasons, and before post-season play in the short season. The Stars Game features a one game match-up of the best players from both Leagues. *HardBall '95* automatically selects the best players at each position. The Stars Game can be simulated or played in full just like any regular season game.

Tie Breakers

After a season is over, two rounds of playoff games begin. If two teams are tied for the division lead when the season ends, they'll play a one-game playoff to determine the outright division winner. When more than two teams in a division are tied for the division lead, two of those teams are randomly chosen to participate in the tiebreaker. (**Note:** If you own one of the teams, it will automatically be selected for the tiebreaker.)

LEAGUE PLAY

League Playoffs

The three division winners and a wild card team each play in a best-of-five series (first team to win three games) to advance to the League Championship game. (The wild card team is the team with the best record of non-division winners. If there is a tie, one team will be randomly chosen to participate.) The team with the best regular season record will host three of the five games versus the wild card team. The division winner with the 2nd best record hosts a series versus the 3rd best division winner. The winners of the two match-ups will then play a best-of-seven series (first team to win four games) to determine the League Champion. The team with the best record hosts. The League Champions then advance to the World Championship.

World Championships

Both League Champions square off in a best-of-seven series to determine the World Champion. Again, the team with the best record during the regular season will host four of the seven games.

Note: Any or all League and World Championship games can be simulated or played in full, just like any regular season game.
