Andretti RACING

SEGA SATURN™

LICENSED BY SEGA ENTERPRISES, LTD. FOR PLAY ON THE SEGA SATURN™ SYSTEM

T-5020H

WARNING: READ BEFORE USING YOUR SEGA VIDEO GAME SYSTEM.

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game—dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions—IMMEDIATELY discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Still pictures or images may cause permanent picture-tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

This official seal is your assurance that this product meets the highest quality standards of SEGA.™ Buy games and accessories with this seal to be sure that they are compatible with the SEGA SATURN™ SYSTEM.

HANDLING YOUR COMPACT DISC

- Ⓜ The Sega Saturn disc is intended for use exclusively in the Sega Saturn system.
- Ⓜ Do not bend it, crush it, or submerge it in liquids.
- Ⓜ Do not leave it in direct sunlight or near a radiator or other source of heat.
- Ⓜ Be sure to take an occasional recess during extended play, to rest yourself and the Sega Saturn compact disc.
- Ⓜ Keep your Sega Saturn compact disc clean. Always hold by the edges, and keep it in its case when not in use. Clean with a lint-free, soft dry cloth—wiping in straight lines from center to edge. Never use solvents or abrasive cleaners.

This product has been rated by the Entertainment Software Rating Board. For information about the ESRB rating, or to comment about the appropriateness of the rating, please contact the ESRB at 1-800-771-3772.

STARTING THE GAME

1. Turn ON the power switch on your Sega Saturn system.
2. Make sure a control pad is plugged into the port labeled Control 1 on the Sega Saturn system.
3. Open the disc tray and place the disc inside.
4. Press **START** to advance to the Main menu.

NOTE: If you have a back up RAM cartridge connected to your Sega Saturn system, a message appears asking you to choose your save destination.

NOTE: If you do not have enough free memory, a message appears offering the choice between freeing up memory and playing without saving.

CONTROL SUMMARY

GETTING THROUGH THE MENU SCREENS

ACTION	COMMAND
Highlight option	D-Pad ↑
Change highlighted option	D-Pad ↔
Select option	C
Return to previous screen	B

NOTE: Check the on-screen instructions for additional commands specific to the current menu.

DRIVING CONTROLS (DEFAULT)

ACTION	COMMAND
	D-Pad ↔ + ↑ for Easy Turning D-Pad ↔ for Normal Turning D-Pad ↔ + ↓ for Tight Turning
Brake	B
Accelerate	A or C
Change racing view	X or Z

IN THE PITS

ACTION	COMMAND
Highlight service	D-Pad ↑
Check/Cancel fuel and tires; Decrease/Increase wing downforce	D-Pad ↔
* Splash and Go (stop fueling and go)	A or C

* To execute a Splash and Go, you must cancel the tire service before your car comes to a stop.

NOTE: When entering pit row, you can make pit stop adjustments only after the PIT menu appears and before your car stops in its pit space.

ANDRETTI RACING

Only one word describes the combination of blurring speed and precision control as only the world's most exciting sport delivers: Addictive! Indy car and Stock car circuits, 16 challenging tracks, 2-player split-screen mode, and Exhibition and Career play give *Andretti Racing* the replayability to keep you coming back for just one more race...

- ⊗ INDY CAR CIRCUIT: Lightning acceleration and superb handling through the turns make Indy cars a fan favorite. Concentration, discipline, and speed will make you a winner.
- ⊗ STOCK CAR CIRCUIT: Beefy engines, rugged chassis, and raw power. You'll bump, jar, and force your car through the pack on your way to the checkered flag.
- ⊗ MULTI PLAYER: *Andretti Racing* is the only 32-bit racing simulation to incorporate split-screen mode. Challenge a friend head-to-head with no gameplay slowdown.
- ⊗ RACING SCHOOL: Mario, Michael, and Jeff Andretti joined the EA SPORTS™ design team to keep *Andretti Racing* true to its sport. Their expertise is revealed to you through informative video interviews.

My association with EA SPORTS dates back to 1990. The first game we collaborated on was Mario Andretti's Racing Challenge for the PC. What always strikes me about EA is their enthusiasm, commitment to realism, and openness to my input. I'm especially excited about Andretti Racing on the Sega Saturn system. Never before have I seen a videogame with such a high level of authenticity. The car physics are amazingly true to the real thing. I become more impressed each time I play.

— Mario Andretti

I won't lie and say that playing Andretti Racing contributed to my recent good fortune on the circuit, but the EA SPORTS design team has been quick to analyze the keys to my success and implement that information to the game. Andretti Racing is an incredibly intelligent and well thought out racing simulation. I'm proud to have assisted in its development.

— Michael Andretti

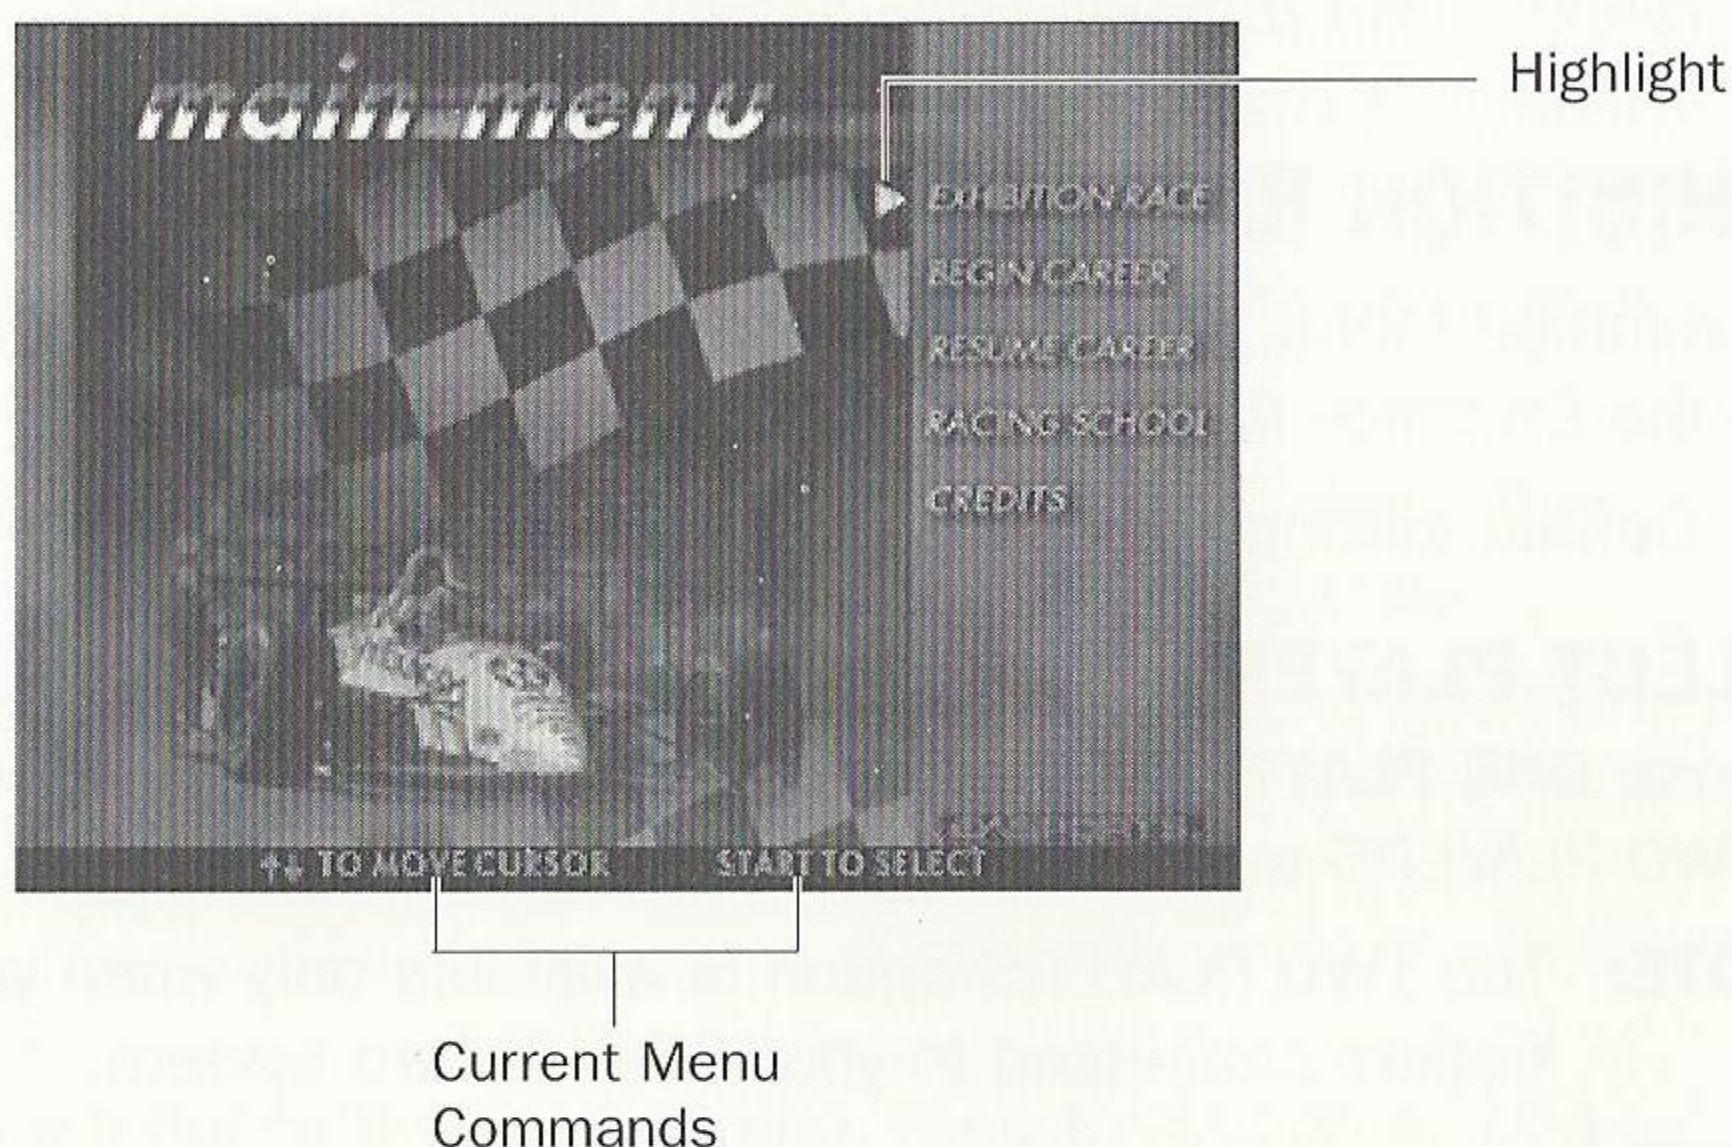

I have played an active role in the development of Andretti Racing from square one: critiquing its progress at each stage of production, designing tracks, and working with programmers to tune the game's racing "feel." The AI of the auto-controlled cars is amazing. I've never played another videogame that instilled such a degree of competition.

— Jeff Andretti

MAIN MENU

The MAIN menu is where you choose *Andretti Racing* game modes. Sign up for an Exhibition race to take a quick spin, embark on a Career, or go to Racing School to study the basics.

To CHOOSE A MAIN MENU OPTION:

1. D-Pad \updownarrow to highlight the option you want.
2. Press **C** to select. The appropriate screen appears.

EXHIBITION RACE

Enter and compete in a single race. See *Setting up an Exhibition Race* on p. 6.

BEGIN CAREER

Commit to a career on the pro-racing circuit. See *Setting up a Career* on p. 10.

RESUME CAREER

Return to complete a saved career. You can save your careers-in-progress to the Sega Saturn system's internal memory or to a back up RAM cartridge. See *Resuming a Saved Career* on p. 12.

RACING SCHOOL

Enroll in the Andretti family's Racing School to learn the fundamentals and pick up a few pointers from the masters. See *Racing School* on p. 14.

CREDITS

The Andretti family enjoyed a little assistance in the development of *Andretti Racing*. Roll the credits to find out who the players are "behind the scenes."

SETTING UP AN EXHIBITION RACE

An Exhibition race is a stand-alone race. The competition is just as solid as it is in Career mode, but you're racing for time and position rather than points.

- Ⓐ To set up an Exhibition race, select EXHIBITION RACE from the MAIN menu. The Exhibition Race screen appears.

EXHIBITION RACE SCREEN

In Exhibition mode, you have full control over the organization of your races. Use the EXHIBITION RACE screen options to set up the type of race you want.

- Default settings in this manual appear in **bold** type.

SELECT PLAYER

Choose **ONE PLAYER** to challenge a pack of 15 computer-controlled cars, or **TWO PLAYERS** to race head-to-head on a split-screen.

NOTE: The **TWO PLAYERS** option is available only when you have two controllers connected to your Sega Saturn system.

NOTE: Computer-controlled cars are not available in split-screen races.

SELECT CIRCUIT

The circuit you choose determines the type of car you drive. *Andretti Racing* includes **INDY CAR** and **STOCK CAR** racing circuits.

SELECT TRACK

Select a track for your next race. Indy cars and Stock cars can compete on all 16 tracks.

SELECT LAPS

You can set your race to **3**, **8**, or **12** laps. The number of laps you choose plays a big part in the importance and frequency of pit stops.

SPEED COMP

Available only when setting up a multiplayer race, Speed Compensation keeps the competition tight by providing a slight speed advantage to any cars trailing the leader. You can toggle this option **ON/OFF**.

DONE

Accept the current Exhibition race options.

- When you choose **DONE**, the **EXHIBITION SETUP** screen appears.

EXHIBITION SETUP SCREEN

When the EXHIBITION SETUP screen appears, you're ready to hit the track.

- ⊙ To begin a race with default settings, choose RACE.

QUALIFY

Available only in one-player races. You get three solo laps to qualify for grid position. (If you choose not to qualify, you start in 16TH position.) Qualifying is also a great opportunity to familiarize yourself with the track before the race.

- Your best lap is compared to the other drivers' times to determine starting positions.
- ⊙ To get an update of your current qualification position, check the POSITION/LAP overlay on the left of your screen after each lap.
- ⊙ If you're happy with your position after the first or second qualifying lap, press **START** to access the Pause menu, then choose QUIT QUALIFYING. You retain your position in the starting grid.

RACE

Load the race and roll out to the starting grid. (See *Racing* on p. 15.)

CAR SETUPS

Modify your car for peak performance on the upcoming track. (See *Car Setup Screen* on p. 8.)

- The CAR SETUP screen appears automatically after a qualifying run, allowing you to make adjustments before the race.

VIEW RECORDS

Andretti Racing compiles stats for each registered user. The EXHIBITION STANDINGS screen displays your Name, Win/Loss record, and Best Lap time.

NOTE: To track stats by a specific name, you must register before you race.

REGISTER

Register your name for the next race. Stats for every race completed with that name are tallied and displayed on the EXHIBITION STANDINGS screen.

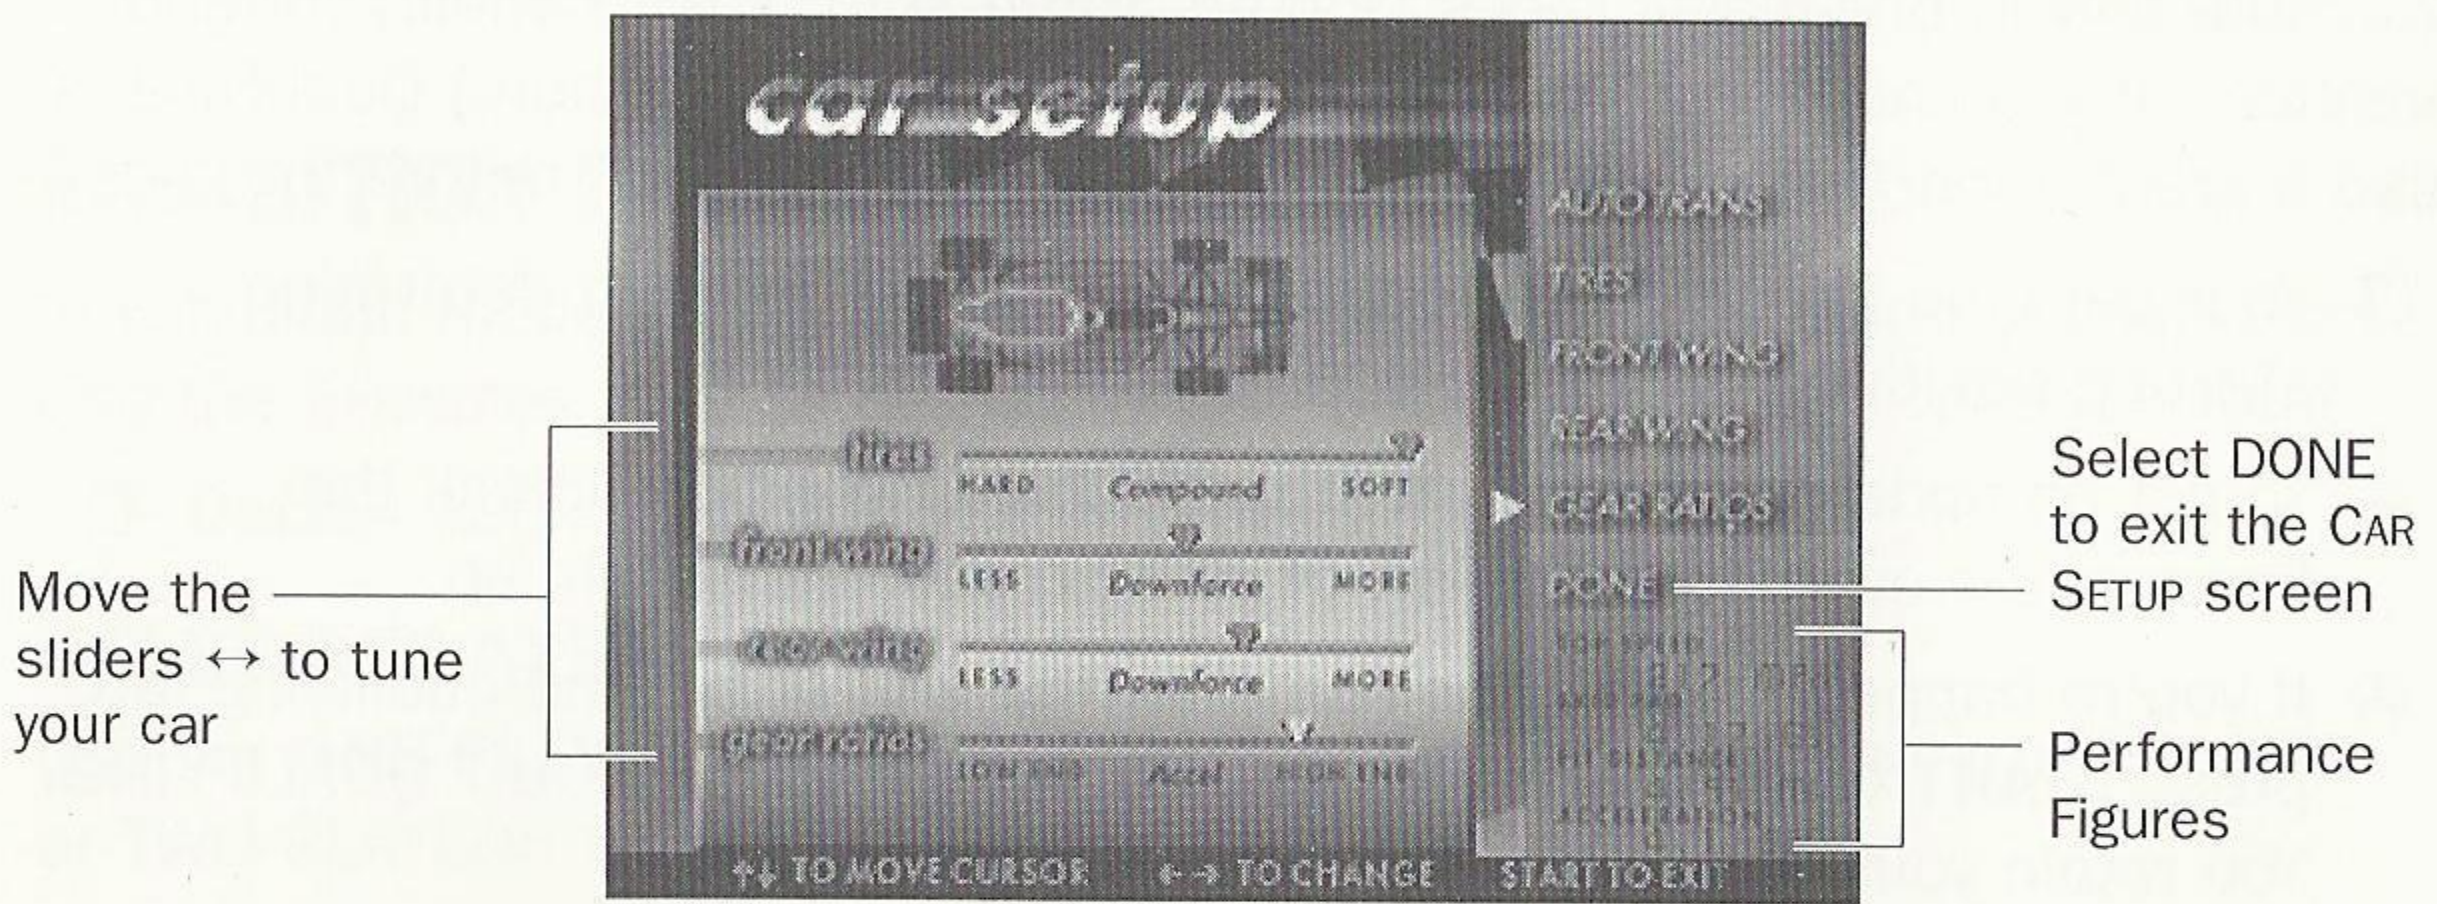

- ⊙ Follow the on-screen instructions to register your name. When you're finished, select END. The REGISTER overlay disappears.

OPTIONS

Set general gameplay options. (See *Options Screen* on p. 9.)

CAR SETUP SCREEN

Easily the most important feature in *Andretti Racing*, Car Setup adjustments allow you to customize your car for specific tracks. Make corrections based on the composition of the track, or wait to see how your car handles during qualifying before tuning. Experiment with different setting combinations.

Move the sliders ↔ to tune your car

Select DONE to exit the CAR SETUP screen

Performance Figures

- ❑ After each alteration, watch the performance figures to see what kind of variance you can expect.

NOTE: The Acceleration figure denotes the amount of time the car takes to accelerate from 1-100 MPH.

- ❑ In two-player races, the Car Setup screen for Player 2 automatically appears when Player 1 exits.

NOTE: Car Setup settings carry over through all phases of a race from pre-qualification tuning, to pit stops. Following a race, all Car Setup options return to their defaults.

SELECT TRANS

Decide on the type of transmission you want. Your transmission choice doesn't alter the performance of the car, but it does add another element to the racing experience. Choose **AUTO TRANS** and concentrate on the pedals and steering or **MANUAL TRANS** to add the challenge of shifting gears.

TIRES

Determine the proper compound of your tires. **SOFT TIRES**, or slicks, grip the track better than hard tires and should be used on courses where control through the turns is more important than flat-out speed. **HARD TIRES** don't adhere to the track as well as slicks but they last longer, allowing you to delay pit stops.

FRONT WING/AIR DAM

Set the amount of downforce on the front end. If you feel as though your car is understeering (steering is slow or unresponsive), it's a good idea to apply more downforce. Less downforce increases top speed.

REAR WING/SPOILER

Set the amount of downforce on the rear end. If you feel as though your car is oversteering (the rear tires are sliding out around turns), you may want to try more downforce on the rear. The more downforce you allocate, the lower your car's top speed.

GEAR RATIOS

Specify your car's optimum gear ratio. In general, a low gear ratio gives your car quick acceleration at slow speeds; a higher gear ratio is best suited to smooth drivers, but it translates to slow acceleration at low speeds. As a rule of thumb, use lower gear ratios on twisty courses and higher gear ratios on mostly straight tracks.

OPTIONS SCREEN

At the **OPTIONS** screen you can adjust your racing environment sounds, displays, and controls. You can also set the durability level of all the cars in the race.

 To exit the **OPTIONS** screen, select **DONE**.

SELECT SOUND

Toggle all sound effects during a race **ON** or **OFF**.

SELECT MUSIC

Toggle the background music played during a race **ON** or **OFF**.

SPEEDOMETER MODE

Set the units of measurement displayed by your speedometer to **MPH** (miles per hour) or **KPH** (kilometers per hour).

SET CONTROLS

If you're not comfortable with the default driving controls, you can change them for your controller. You can edit any racing command except steering.

NOTE TO SEGA ARCADE RACER™ USERS: When playing with the Sega Arcade Racer steering wheel, you can not edit the **L Shift** or **R Shift** functions.

To CONFIGURE YOUR DRIVING CONTROLS:

1. From the **OPTIONS** screen, choose **SET CONTROLS**. The **CONTROL SETUP** overlay appears.
 2. D-Pad \leftrightarrow until the function you want is displayed in the window.
 3. Press the button you want to assign to that function.
-  To accept your changes, press **START**.

SELECT DAMAGE

Set Damage OFF for invincible cars, ON for realistic results from collisions and the possibility of being knocked out of a race, or **LTD** (limited) for cars that sustain damage but rejuvenate to continue racing if they flip or lose a tire.

NOTE: If your car becomes damaged in a collision but you manage to make it back to the pits, your crew completes all necessary repairs.

SETTING UP A CAREER

You begin a Career by driving for an entry-level racing team. Go through an entire 10-race season and try to accumulate as many points as possible. If you turn in a respectable point total at the end of the season, you are asked to drive for a more successful team.

Careers last as many seasons as you can endure. If you reach the top, you'll get the opportunity to drive for the *Andretti racing* team. Within the fifth season of a Career, drivers who win championships on both circuits are inducted into the EA SPORTS Racing Hall of Fame.

- Ⓜ To set up a new Career, select BEGIN CAREER from the MAIN menu. The REGISTER overlay appears.

REGISTER OVERLAY

Register your name at the beginning of a Career. This is the name under which your point totals and stats are tallied throughout your Career.

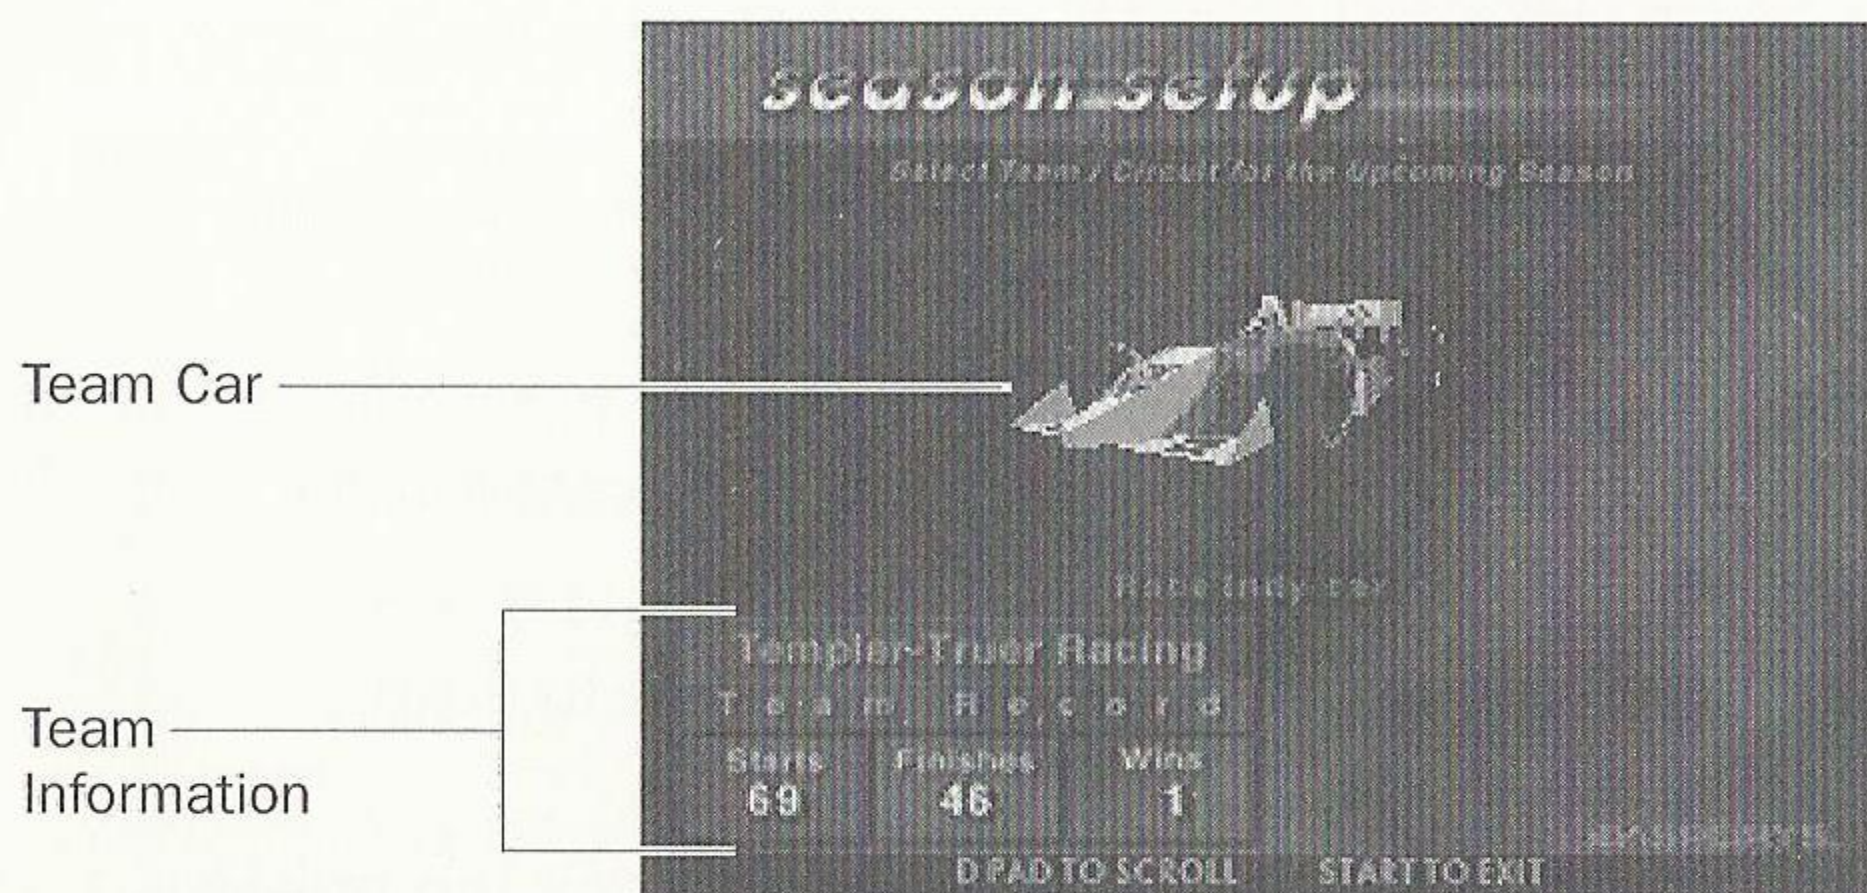

- Ⓜ Follow the on-screen instructions to register your name. When you're finished, select END. The TEAM SELECTION screen appears.
- Ⓜ To close the REGISTER overlay without registering a name, press **B**.

NOTE: Each player must register under a different name.

TEAM SELECTION SCREEN

At the beginning of a new Career, you can race for only one team from each circuit. By the start of your next season, if you posted a respectable point total, additional teams become available.

- Following your team selection, the race announcer (Derek Daly on the Indy car circuit, Bob Jenkins on the Stock car circuit) gives you an overview of the next scheduled race, then the RACE SETUP screen appears.

RACE SETUP SCREEN

Many of the Career mode RACE SETUP items are identical to those displayed in Exhibition mode. The items that appear only in Career mode are described below. For information on other items, see *Race Setup Screen* on p. 8.

VIEW CAREER

Check the statistics on each race of your Career, season by season. The CAREER SUMMARY screen displays season-long accumulative numbers for Wins, Podium Finishes, Finishes, and Starts, as well as track-specific stats such as Qualifying Position, Placed, Time, and Best Lap.

- To view additional track-specific stats, D-Pad \updownarrow .

SAVE CAREER

If you have free space available in your Sega Saturn system's internal memory or on a back up RAM cartridge, you can save your career up to the last completed race. Return to continue a career at any time by choosing RESUME CAREER at the MAIN menu.

TO SAVE A CAREER:

1. From the RACE SETUP screen, choose SAVE CAREER. The SAVE CAREER overlay appears.
2. Using the alphabet grid, follow the on-screen instructions to enter a custom name for your career. When you're finished, select END. A highlight appears in the memory window.
3. D-Pad \updownarrow to highlight the memory slot to which you want to save. (Up to eight slots are available.)
- Ⓐ If you select an occupied slot, your current career deletes the previous one. A text box prompts you to confirm your decision. Press **START** to accept; **B** or **C** to cancel.
4. When your season is saved successfully, press **C** to continue. The SAVE CAREER overlay disappears.

EXIT CAREER

When you select EXIT CAREER, you exit Career mode and return to the MAIN menu, where you can continue racing in another mode.

RESUMING A SAVED CAREER

You can begin and save up to eight Careers. Whenever you're ready to continue a Career, Resume Career is your ticket back to the circuit.

TO RESUME A SAVED CAREER:

1. From the Main menu, select RESUME CAREER. The RESTORE CAREER overlay appears.
2. Select the Career you want to resume from the list. The CHAMPIONSHIP STANDINGS screen for that Career appears.
3. Check your point total at the CHAMPIONSHIP STANDINGS screen, then exit. The RACE SETUP screen appears.
4. Proceed with your Career on the next scheduled race.

ANDRETTI RACING SEASON SCHEDULE

Throughout a career, the order of races is consistent from season to season. Check the tables below to see which tracks are on the horizon, the distance of the tracks, and how many laps are required to complete each race.

STOCK CAR CIRCUIT

WEEK	LOCATION	DISTANCE	LAPS
1	Calder Park Thunderdome	1.098 mi.	12
2	Vallejo Speedway	1.873 mi.	8
3	Binghampton Speedway	1.557 mi.	8
4	Bridgeport Speedway	1.460 mi.	12
5	Glacier Fields	1.899 mi.	8
6	Pacific Place, Vancouver	1.677 mi.	8
7	Kings Beach	1.911 mi.	8
8	Streets of Cincinnati	1.475 mi.	8
9	Exhibition Place, Toronto	1.780 mi.	8
10	Grand Rapids Motorsports Complex	1.979 mi.	8

INDY CAR CIRCUIT

WEEK	LOCATION	DISTANCE	LAPS
1	Pacific Place, Vancouver	1.677 mi.	8
2	Oasis Raceway	1.426 mi.	8
3	Kings Beach	1.911 mi.	8
4	Grand Rapids Motorsports Complex	1.979 mi.	8
5	Longhorn International Raceway	1.665 mi.	8
6	Exhibition Place, Toronto	1.780 mi.	8
7	Phalanx Sports Car Course	2.075 mi.	8
8	Oceanside International Raceway	1.458 mi.	8
9	Surfer's Paradise, Australia	2.795 mi.	8
10	Meibashi Circuit	2.489 mi.	8

RACING SCHOOL

We invited Mario, Michael, and Jeff Andretti to join our design team, then sat down and grilled them with tough questions on the sport of Auto Racing. Not only did we translate their vast experience behind the wheel to the physics of the game, we also captured it in video interview clips and created the Racing School.

The Racing School contains something for everyone, from the Auto Racing enthusiast to the hard-core *Andretti Racing* gamer.

🕹️ Follow the on-screen instructions to view Racing School videos.

RACING

Racing controls are consistent throughout all *Andretti Racing* game modes. Whether you're qualifying for time or dueling for position, the information in this section will give you a good idea of how to perform on the track.

DEFAULT RACING COMMANDS

THE GREEN FLAG

When the race loads, your car is approaching the Start/Finish line at the end of the pace lap. Listen for the race announcer, then take control of your car when the Green flag appears.

RACING VIEWS

Andretti Racing has three different views you can use during a race:

Behind the Car, **Above the Car**, and **In the Car**.

BEHIND THE CAR This fixed camera sits directly behind your car, allowing you to see upcoming turns and opponent's noses as they close in on you. If you have Damage ON or LTD, you can visually track the condition of your car.

ABOVE THE CAR Another view from behind your car, this camera is elevated and set further back, bringing a considerably larger portion of the track into the picture. Beginners may want to start with this generous view.

IN THE CAR The most realistic and challenging of the three views, this angle seats you right in your car's cockpit. Turns appear out of nowhere, phantom cars bump you from behind, and you get a very limited perspective on your car's condition. You'll also have a lot more fun!

- Ⓜ Races begin with the default racing view (Behind the Car). To change this view, press either View Up button shortly after your car crosses the Starting line.

MAP AND TIME INDICATORS

In full-screen races, the Map and Time Indicator appear on the right side of the screen. In split-screen races, the Time Indicator is not displayed.

- MAP** The map provides a general outline of the current track. Check the map to see upcoming turns and your position among the field. The three lead cars are labeled **L**, **2**, and **3** on the map, and your car is labeled **P**. Two-player races depict Player 1 and Player 2 as **1** and **2**.
- TIME INDICATOR** The Time Indicator displays three time modes: Lap Time, Best Lap, and Time Elapsed. During qualification, Best Lap determines your grid position.

- Ⓜ Races begin with the Map and the Time Indicator displayed. Press the Overlay button to select both ON, both OFF, or one ON and one OFF.

THE PAUSE MENU

The PAUSE menu appears on the screen whenever you pause a race. From the PAUSE menu, you can adjust sound and music options, view a replay of the action, check race stats, or quit the current race.

- Ⓜ To pause a race, press **START**. The PAUSE menu appears.
- Ⓜ To quickly return to the race, press **START** with any PAUSE menu option highlighted.

RESUME RACE/QUALIFYING

Get back to the racing action.

INSTANT REPLAY

Replay the last several moments of race footage. Instant Replay mode has seven camera angles (some fixed, some mobile) that allow you to watch the action from every position.

- Ⓜ To control the replay, use the button commands on the top-left of the screen.
- Ⓜ To exit an Instant Replay, press **START**. The race resumes.

RACE STATISTICS

At any time during a race, you can check the RACE STATISTICS overlay to see the position of every driver, their current lap, and elapsed time.

- Ⓜ To close the RACE STATISTICS overlay, press **A** or **C**.

SOUND EFFECTS

Toggle sound effects during a race **ON** or OFF.

MUSIC

Toggle the background music played during a race **ON** or OFF.

QUIT RACE/QUALIFYING

Exit the current race. Your name appears on the post-race screens followed by the letters DNF (Did Not Finish).

NAVIGATING THE PITS

Once you pass through the pit entrance, your racing view changes to In the Car, the PIT menu appears, and your car enters auto-pilot mode. A standard pit stop refuels the car and installs a new set of tires.

- Smoothly executed pit stops are essential to successful racing. Races can be won or lost in pit row.

If you want to make changes to your pit services, you can access the PIT menu while your car automatically steers into its stall.

-  To toggle the fuel or tire service **ON/OFF**, highlight the appropriate item, then D-Pad \leftrightarrow .
-  To adjust front or rear wing downforce, highlight it, then D-Pad \leftrightarrow .
-  For a Splash and Go pit, turn off all services except Fuel. When you think you've taken enough fuel, hit the accelerator and go.

NOTE: You have control over the PIT menu only as long your car is rolling to its designated position in pit row. When your car comes to a stop, you can make no further changes.

THE CHECKERED FLAG

As you cross the Start/Finish line following the final lap, the Checkered flag appears and your finishing place is displayed. At the end of a qualifying run, this is your position in the starting grid; at the end of a race, this is your final position.

- If you just finished a qualifying run, the CAR SETUP screen appears. Make any adjustments you need for the track, then exit. Your race loads.
- After an Exhibition race, the RACE RESULTS screen appears. Check your position and time behind the leader, then exit. The EXHIBITION RACE screen appears.
- After Career races, the CHAMPIONSHIP STANDINGS screen follows the RACE RESULTS screen. Find your place on the leader board and your running point total, then exit. The announcer returns with an overview of the next scheduled race, then the RACE SETUP screen appears.

TWO-PLAYER RACES

A race in Two-Player mode is a split-screen, one-on-one challenge between you and a friend. If two controllers are connected to your Sega Saturn system, select TWO PLAYERS from the EXHIBITION RACE screen, and find out who's the superior driver.

Two-player races end as soon as the first player captures the Checkered flag. The cars remaining on the track are awarded their current positions.

SPEED COMP.

The Speed Comp. option appears on the EXHIBITION RACE screen only after you select TWO PLAYERS. Speed Compensation is used to counterbalance the first place driver's dominance by providing the second driver with a speed boost. As the lead changes hands, so does the Speed Comp. benefit. Speed Comp. races tend to be close and are usually decided on the final lap.

JEFF ANDRETTI'S RACING TIPS

The keys to success in *Andretti Racing* are identical to the keys to success on the pro circuit, and no one knows that better than Jeff Andretti. We persuaded Jeff to share some of his *Andretti Racing* tips with you—this is the same kind of info you'd pay thousands of dollars for at a pro driving school.

DRIVING

The physics of the *Andretti Racing* cars are designed to the specifications of real Indy cars and Stock cars. The computer-controlled cars perform just like professionally driven cars would in similar race conditions.

GENERAL

- ▶ **TIP:** You can get a speed boost (and better gas mileage) by drafting the car in front of you. To draft, position your car directly behind the car in front of you. The closer you are, the faster you'll go.
- Drafting is essential to your success on the Stock car circuit.
- ▶ **TIP:** In most cases, the other drivers in *Andretti Racing* are reluctant to let you pass. Often they'll weave back and forth to cut off your lanes. When this happens, back off and draft for a while. Get the timing of the other driver's weaving down, then you can pass unscathed.
- ▶ **TIP:** If a car coming up behind attempt to pass, don't waste your time trying to block it: it'll only slow you down. Instead, let the car pass, then slip in behind to catch its draft.

- **TIP:** There are renegade drivers in *Andretti Racing* who would rather bump you from behind than pass cleanly, leaving you spinning in their wake. Don't turn your wheels against the spin; turn into the slide and release the accelerator. When your car's nose is pointing back in the direction of the track, hit the gas. You'll pull right out of the spin.

CORNERING

- **TIP:** When driving through an S-turn, or chicane, consider both turns equally. Because acceleration out of the second turn is more important than mid-corner speed, use the first corner to properly set up for the second turn.
- **TIP:** Always look ahead of your car when driving through turns. When entering a turn, your eyes should already be focused on the center of the turn, or the apex. When you hit the apex, your focus should be the exit.
- **TIP:** If you must slow your car through a turn, do it before you begin the turn. In other words, by the time you begin turning the steering wheel your foot should already be off the brake and back on the accelerator.
- **TIP:** By outbraking (braking later than a competitor), you can gain an advantage going into a turn. To outbrake, take the inside line going into a corner and brake later than the car in front of you. You then catch up to him on the inside, forcing him to let you by.

PIT STOPS

- **TIP:** It's important to figure out exactly when you need to pit on each track. If you can pit more efficiently than the pack, you will gain a clear advantage. For example: In a 12-lap Indy car race at Binghampton, most of the computer-controlled cars pit twice. With the right car setup, you can avoid the pits until the sixth lap, and get away with just one stop.
- **TIP:** If you know you'll have to pit more than once during a race, try to judge how much fuel you need between stops. In most cases, it's less than a full tank. You can leave the pits as soon as your car has tires, so hit the accelerator when you think you've got enough.
- **TIP:** This won't earn you any sportsmanship awards but it may help you win a race. When challenging a friend in two-player mode, try giving the other driver a little nudge into the pit entrance. If you're lucky, you're opponent will be too frustrated to remember to de-select the tire service.

CAR SETUPS

- ▶ **TIP:** In general, adjusting wing downforce one notch alters your top speed by 2 MPH. When you're racing on "fast" tracks and ovals, top speed is the key to victory—reduce your wing downforce significantly.
- ▶ **TIP:** It's easy to concentrate on your rear wing (that's the one sliding out all over the place), but don't forget about the front wing, or air dam. It's important to achieve balance in your car; many times you'll have to adjust both wings to correct a pushing (understeering) car.
- ▶ **TIP:** If you like the lower gears, stay in your opponents' draft, then pass in the last corner. If your car is running in the high end, you've got a better chance to pull away; when this happens, don't let the other cars use your draft.
- ▶ **TIP:** When it comes to car setups, the best tip is to experiment. The proper car setup depends on your driving style. Because no two people will ever navigate a track the same way, no one setup is guaranteed.

ELECTRONIC ARTS LIMITED WARRANTY

Electronic Arts warrants to the original purchaser of this Electronic Arts software product that the medium on which this computer program is recorded is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase. This Electronic Arts software program is sold "as is," without express or implied warranty of any kind, and Electronic Arts is not liable for any losses or damages of any kind resulting from use of this program. Electronic Arts agrees for a period of ninety (90) days to either repair or replace, at its option, free of charge, any Electronic Arts software product, postage paid, with proof of purchase, at the Electronic Arts Warranty Department. This warranty is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the Electronic Arts software product has arisen through abuse, unreasonable use, mistreatment or neglect.

LIMITATIONS—This warranty is in lieu of all other warranties and no other representations or claims of any nature shall be binding on or obligate Electronic Arts. Any implied warranties applicable to this software product, including warranties of merchantability and fitness for a particular purpose, are limited to the ninety (90) day period described above. In no event will Electronic Arts be liable for any special, incidental, or consequential damages resulting from possession, use or malfunction of this Electronic Arts software product.

Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages so the above limitations and/or exclusions of liability may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

NOTICE

Electronic Arts reserves the right to make improvements in the product described in this manual at any time and without notice.

RETURNS AFTER WARRANTY—To replace defective media after the ninety (90) day warranty period has expired, send the original CD to Electronic Arts' address below. Enclose a statement of the defect, your name, your return address, and a check or money order for \$15.00.
