FLINK™

The peaceful people of Imagica Island lived a happy life, casting helpful spells and enjoying the uncommonly pleasant weather.

But their peace was destroyed when Wicked Wainwright, an evil Wizard, captured the four wise rulers of Imagica to take control of the Island. He transported the wise rulers' spirits into four hidden crystals, and scattered them throughout the Island.

Meanwhile, Wainwright's volcano headquarters belched a dark cloud of smoke across the land, bringing even more unhappiness to the people.

Flink, an apprentice Wizard, must travel the length and breadth of Imagica, clearing away the dark clouds, collecting magical ingredients and casting spells, in his quest to find the four crystals.

Once the crystals are reunited, they will open the gateway to the Wizard's lair, where Flink must face Wicked Wainwright in a showdown to recapture Imagica Island for the forces of good.

COMBINATION CONTROLS

Down and Button 'A' - Allows Flink to kneel down and pick up objects.

Left, right, or up, and Button 'A' - Controls the direction in which Flink throws objects.

Left/right and Button 'B' - Controls the direction in which Flink jumps.

THE MAGICAL OPTIONS SCREEN

As you guide Flink through the game, you can collect magic ingredients and scrolls. Pressing the 'start' button will summon up an options screen which allows you to mix and use spells.

A menu of options will appear. To move around these options, use the Control Pad. To select an option or item, use any button - 'A', 'B' or 'C'.

First choose the 'read scrolls' menu, and read any spell-scrolls you've collected. If you haven't collected any scrolls, you'll have none to read.

The scrolls tell you what ingredients each spell requires. But, as Flink is only an apprentice magician, they won't always be in the exact order!

To mix spells, leave the 'read scroll' screen (click on the 'arrow' icon) and choose the 'create spell' option.

The magical ingredients you have collected will be shown here. To put them in Flink's cauldron, pick the ones you want using any button - 'A', 'B' or 'C'. If you change your mind, the 'CLR' option will clear the ingredient slots and you can start again.

Once all three ingredient slots are filled, select 'mix' and Flink will put them in the cauldron. If you've put the right things in the right places, you've created a spell! If not, things might blow up in Flink's face!

Remember, every time you mix a spell, you lose the ingredients you've put in the cauldron, so use them carefully.

Each spell you've created will be shown on the 'select spell' screen as an emblem (to see them leave the 'create spell' screen and choose 'select spell'). If you want to use one, select it and it will be surrounded by a special spell-frame. To return to the game, press the start key.

To cast the spell displayed, press the 'C' button - if you've got enough magic energy it'll be cast; if you don't, it won't! IN addition, a low magic energy level may even keep you from creating a spell in the first place! (When you don't have enough magic energy, the magic energy bottle in the top left hand corner of the screen will flash on and off).

THE SPELLS

Spirit bomb:	Sends magic energy bombs towards your enemies.
Demon spell:	Summons up a helpful demon, but uses a lot of magic energy.
Magic shield:	Protects you against your enemies.
Platform spell:	Creates temporary platforms to visit those hard-to-reach areas!
Dust devil:	Sweeps away your foes with mini-tornadoes.
Lightning spell:	Creates an instant thunder-storm - look out below!
Quick grow:	Stand on a leaf and cast this spell to rise up high.

SPECIAL ZONES AND SPELLS TO MATCH

Some parts of Imagica Island can only be visited by using special spells. You'll only be able to cast these when the time is right.

Spirit world spell - Carries Flink away to the metaphysical world

Shrink spell - Makes Flink small enough to enter a special secret zone!

MAGIC ENERGY

Each time you squash one of your foes (by bouncing on their heads/throwing something at them etc.), you gain their magical energy. Your level of magic energy is displayed in the bottle on the top-left corner of the screen.

If an enemy hits you and you lose your energy, it will re-appear around you. You can grab some back if you're quick enough.

When you have no magic energy, your energy bottle (in the top left hand corner of the screen) will flash on and off. If you touch an enemy when you have no magic energy, you'll lose a life.

TREASURE CHESTS

Assorted items (scrolls, magic ingredients, keys, extra energy etc.) can be found inside the Treasure Chests. You can also throw them at enemies - very effective! You can throw each Treasure Chest more than once, and sometimes you'll have to.

Some the Treasure Chests are pad-locked, but you can use keys to open them. Any keys you collect will be displayed on the 'spell select' menu. Just select a key as you would a spell and bounce on the chest to open it!

HELP! INFORMATION SCROLLS

As well as spell scrolls, you'll find information scrolls (marked with the letter 'I'). Pick them up and read them (Down & Button 'A') for hints and playing tips.

LEVEL SELECTION

Once you've completed a level, you can move on to the next, which will be revealed as the clouds roll back across Imagica Island. Use the Control Pad to fly between stages and use Button - 'A', 'B' or 'C' - to land.

If you want to re-visit a level you've already finished, to try and collect extra magic energy or spell ingredients. You can do this while in the between-levels selection screen.

If you don't want to complete the whole level all over again, choose the 'leave level' option on the magical options screen (press 'start' to see it). This will take you back to the level selection screen (remember, you can only do this on levels you've already completed).

THE BAD GUYS

The evil agents of Wicked Wainwright have over-run the Island! Watch out for the Thieves (they'll steal your magic ingredients if you're not careful) and the Crazy 'Copters (a hint to remember when they fly around - you can throw things upwards, not just left or right). If you stun one of Wainwright's Warriors, you can pick him up and throw him as a weapon, but don't hang on to him for too long.
