The Mega Drive Experience

The Mega Drive experience means super high quality graphics, stereo sounds and games that will blow you away. The powerful 16 BIT processor handles over a quarter of a million colours, generates awesome stereo FM sounds through ten sound channels and is the ultimate challenge for game players.

Double scrolling graphic technology built in enables the Sega Mega Drive to create the most exciting and

challenging games ever seen on any game console. With the built-in Z80 processor and optional power base converter, you can play all Sega Master System games - over 120 titles already available.

The built-in head phone jack lets you enjoy the growing range of 36 games in true stereo on your own headphones. Accessories due for release during 1991 include a Mega Drive modem and CD ROM drive.

Experience the Ultimate in the World of Home Entertainment.
